Support, projects and equipment for restaurants, retail, hospitality and offices.

Support

Outsourced IT support for businesses that need a named company to answer, visit and keep records. A monthly arrangement can include remote support, scheduled visits, vendor coordination, documentation and preventive maintenance.

Projects

New branches, relocations, cabling, network design and coordination with the fit-out team. The scope is written for the site in front of us, not copied from a package that does not match the drawings.

Equipment

Computers, network equipment, POS peripherals, printers, cameras and phones can be quoted for supply, installation, support, or a combination. A price is shown only when it has been published. Otherwise we quote the items you name, including comparable options when the exact model is not fixed.

What we need from you

The site or sites, what is failing or what must be ready, and one way to contact you. Counts can be approximate.
